

Cristhian Jaramillo

Data Analyst | Quantitative Analysis & Data Insights

London, UK | cristhianjaramillo.com

Professional Profile

Data analyst and quantitative researcher with over five years of experience analysing large and complex administrative, survey and longitudinal datasets across academia, government and public-sector organisations. Experienced in data integration, cleaning, transformation and validation, statistical analysis, trend analysis and data visualisation. Advanced user of R and Excel with experience in SQL, Python, Stata, Tableau and Power BI. Develop reproducible analytical workflows and translate complex data into clear insights, reports and evidence to support strategic, operational and policy decision-making.

Technical Skills

Data Analysis: Data cleaning, data transformation, data integration, data validation, exploratory data analysis, trend analysis, comparative analysis, statistical analysis, regression analysis, longitudinal analysis, hypothesis testing.

Tools: R, SQL, Excel, Python, Stata, Tableau, Power BI, Git.

Reporting & Data Management: Data visualisation, analytical reporting, reproducible workflows, automated data processing, data quality assurance, administrative data, survey data, stakeholder reporting, research communication.

Professional Experience

Research Assistant

Feb 2023 – Present

Care Policy and Evaluation Centre, London School of Economics and Political Science

London, UK

- Analyse large-scale administrative, survey and longitudinal datasets to identify trends, patterns and drivers of variation across populations, services and geographical areas, generating evidence to support policy decision-making.
- Integrate, clean, transform and validate complex datasets from multiple organisations and across different years to produce consistent analytical datasets.
- Reconcile differences in variable definitions, geographical structures, missing information and data quality, applying systematic quality assurance throughout the analytical process.
- Conduct statistical and comparative analyses in R to examine service provision, expenditure, population characteristics and outcomes across local areas.
- Develop reproducible analytical workflows in R, automating data processing, analysis, visualisation and reporting to improve efficiency, consistency and transparency.
- Produce data visualisations, analytical reports and research outputs that translate complex quantitative findings into accessible evidence for researchers, policymakers and other technical and non-technical stakeholders.
- Collaborate with researchers and external stakeholders to translate substantive questions into analytical requirements, develop appropriate approaches and interpret findings.

Selected analytical work: large-scale local authority data integration and comparative analysis; longitudinal analysis of health and social care trajectories; automated and reproducible analytics in R; behavioural and survey data analysis.

Technical Secretary

May 2022 – Jun 2022

Electoral Institute of Mexico City

Mexico City, Mexico

- Analysed operational and administrative information and produced analytical reports supporting electoral planning and organisational decision-making.
- Coordinated data collection and information from stakeholders to support accurate operational delivery.
- Produced technical and analytical outputs communicating evidence to stakeholders involved in electoral administration.

Researcher

Apr 2019 – Sep 2022

National Office of Electoral Processes of Peru

Lima, Peru

- Designed and conducted quantitative research using large administrative and survey datasets to analyse electoral behaviour, public opinion and institutional performance.
- Applied statistical methods to identify trends, test research hypotheses and examine differences across populations, geographical areas and time.
- Integrated, cleaned and validated datasets from multiple sources, assessing data quality and ensuring analytical consistency and accuracy.
- Produced statistical analyses, data visualisations and analytical reports translating complex findings into accessible evidence for senior decision-makers and external audiences.
- Managed research projects from analytical design through analysis, reporting and dissemination, collaborating with government institutions, academics and external researchers.

Earlier Research & Government Experience 2015 – 2019

Research and policy roles across the Presidential Office of Peru, National Jury of Elections and Ministry of Education involving quantitative research, data analysis, policy evaluation, stakeholder engagement and technical reporting. Member of the Technical Secretariat of the High-Level Commission for Political Reform, Presidential Office of Peru (2019).

Education

MSc Social Research Methods 2022 – 2023

London School of Economics and Political Science

Dissertation (Distinction): *Unravelling Party Discipline in the Global South: A Case Study of Peru Using Beta Regression Analysis*.

Advanced training in quantitative methods, statistical modelling, causal inference, research design and applied data analysis.

BSc Political Science and Government 2012 – 2017

Pontifical Catholic University of Peru

Dissertation (Distinction): *Catching the Big Fish: Subnational Corruption in the Cases of Callao and Tumbes*.

Selected Publications

Fernández, J. L., Jaramillo, C. & Cartagena-Farias, J. (2025). *Using administrative data to map social care trajectories post-hospital discharge*. NIHR Policy Research Unit.

Fernández, J. L., Jaramillo, C. & Cartagena-Farias, J. (2025). *Factors associated with variations in the type and intensity of local authority social care for older people: The role of the voluntary sector*.

Jaramillo, C. (2023). "The Impossibility of Party Unity in Peru: Party Affiliation, Subnational Electoral Competition and Party Discipline (2011–2019)." *Bulletin of Latin American Research*.

Awards, Grants & Recognition

Oxford LLM Workshop Travel Grant 2023

Selected for travel funding and registration to attend the Large Language Models Workshop organised by the University of Oxford.

Beca Generación Bicentenario Scholarship 2022

Competitive postgraduate scholarship awarded to 150 students from across Peru, covering academic and ordinary expenses for postgraduate study.

LASA2022 Travel Grant 2021

Awarded a \$500 travel grant and conference registration based on proposal quality.

Second Place, Best Thesis Competition 2018

Recognised for outstanding achievement in the Faculty of Social Sciences at the Pontifical Catholic University of Peru.

Professional Development

ECPR Summer School 2023

Bayesian Modelling and Data Visualisation in R.

University of Oxford – Nuffield College 2023

Large Language Models Workshop.

HarvardX Data Science Series 2018–2020

R programming, data wrangling, statistical modelling, machine learning and data visualisation.
